Product Description

Many potential homeowners are looking for lower construction and maintenance costs. Container homes are exactly what they sound like; homes made from the steel shipping containers that you see carrying goods everywhere on trains, trucks, and ships. Shipping containers are generally available in 10ft, 20ft, and 40ft. The smallest shipping container can provide about 100 square feet of floor space for a shipping container home.

The baodu container house is different than normal houses. We offer high quality container houses in modular design at reasonable prices. The container house is the ideal solution when it comes to quickly and easily create an attractive living and working space. Apart from the fact that the container houses do not need to be approved by most authorities, they can easily be dismantled after installation and placed at a different place of use, as desired.

The container homes. These houses stand out with their affordable economic conditions for everyone, more ecological and environmentally friendly and renewable flexible structures than concrete. It also gets acclaim for its super-fast construction processes with its modern designs and portable modularity. Container houses are used with many different functions in the world, from cafe shops to outbuildings and guest houses, from playgrounds for children to restaurants on service areas.

You can own a house through the container homes in areas where construction is forbidden, even on difficult terrains or on sloping ground. You can choose ready-made structures produced as modular, or you can take advantage of the customized production option. It will be sufficient to assemble the manufactured structure in the area. This means that you will save time, money and labor compared to conventional building constructions lasting for months. You can easily have sound and heat insulation at container homes. The latest products produced with new technology allow you to benefit from renewable energy sources. In this way, you will reduce your billing costs while protecting environment. You can move the structure to a new place and add new modules whenever you want.
