

Reinforced Galvanized Steel Plate Decking Floor 2mm

Our Product Introduction

for more products please visit us on baodupanel.com

Basic Information

- Place of Origin: Hebei,China
- Brand Name: BAODU
- Certification: ISO9001
- Model Number: Steel Floor Decking
- Minimum Order Quantity: Discussible
- Price: Reasonable
- Packaging Details: In general, for steel structure , we use the steel frame packing to keep goods not to be broken . For sandwich panel and color steel sheet, we use the plastic packing . If the clients need special packing will according to their requirements.
- Delivery Time: 21days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 40000 Ton/Tons per Month

Product Specification

- Product Name: Reinforced Galvanized Corrugated Metal Decking Sheet Steel Composite Floor Decking
- Tensile Strength: High
- Fire Resistance: High
- Color: Silver
- Corrosion Resistance: High
- Thickness: 0.8mm-3.0mm
- Length: Customized
- Design Style: Industrial,Modern
- Type: Floor Decking
- Keyword: Steel Floor Decking
- Highlight: **Reinforced Galvanized steel plate decking ,**
Color steel plate decking

Product Description

Reinforced Galvanized Corrugated Metal Decking Sheet Steel Composite Floor Decking

Product Description:

Steel Floor Decking is the perfect choice for large-scale industrial and modern structure buildings. It is made of high-strength steel coils and sheets that are processed by special cold-formed or hot-formed technology, and then coated with custom-made paint for anti-corrosion and anti-slip. With its strong tensile strength, it ensures a long durability and can withstand extreme weather conditions and environmental factors. In addition, this type of steel decking has superior sound insulation performance, providing a quiet and tranquil atmosphere. It is also easy to install and maintain, making it a cost-efficient and environmentally friendly solution for steel structure buildings.

Features:

Versatile: Combined profile allows easy service attachment, with trapezoidal spanning ability.

Reduced number of secondary beams: The use of this profile allows a designer to reduce still further the number of secondary beams in a building to give a cleaner lower cost structure.

Low concrete and steel usage: A low volume of concrete is needed reducing weight and steel requirement.

Central stud placement: Shear studs are placed centrally in the troughs to ensure beneficial placement.

Applications:

Steel Floor Decking, supplied by BAODU, is a steel deck for steel structure building, designed to provide superior performance and long-lasting durability. It is manufactured with high quality steel material, ensuring corrosion resistance, sound insulation, and high bending strength. The Steel Floor Decking System is ISO9001 certified and comes with minimum order quantity that is discussible, and reasonable price. Packaging is generally by steel frame to keep goods not to be broken, and sandwich panel and color steel sheet use plastic packing.
