50mm EPS Roof Panel,
50mm Exterior Metal Siding Insulation Panel**

Energy Saving EPS Roof Panel Exterior Metal Siding Insulation Panel 50mm EPS Sandwich Panel

Product Description:

Our EPS sandwich panel is designed to provide a high level of protection and insulation for your building. The panel is waterproof, ensuring that it can withstand harsh weather conditions and protect your building from moisture damage. This makes it an ideal solution for outdoor use where water resistance is a must.

In addition to being waterproof, our EPS sandwich wall panel is also fireproof, providing an added layer of protection for your building. It is designed to resist fire and prevent the spread of flames, helping to keep your building safe in the event of a fire.

The EPS sandwich panel is also soundproof, making it an excellent choice for buildings located in noisy environments. The panel is designed to absorb sound waves, reducing the amount of noise that enters your building. This makes it an ideal solution for factories, exhibition halls, and other large buildings that generate a lot of noise.

In conclusion, our EPS sandwich wall panel is an ideal solution for anyone looking for an outdoor waterproof fireproof panel that also offers soundproofing capabilities. This panel is perfect for various roofs and walls of large size factory warehouse exhibition halls and more, and it is designed to offer the highest level of protection and insulation for your building.

EPS foam sandwich panel, EPS sandwich wall panel, EPS sandwich wall panel

Applications:

One of the product applications of EPS Sandwich Panel is for building roofs. The EPS roof panel sandwich is a popular choice for commercial and industrial buildings because it offers superior insulation and durability. It can withstand extreme weather conditions and can last for up to 30 years. The width of this panel is 960mm, making it easy to install and transport. It is also lightweight and can reduce the overall weight of the building.

Another application of EPS Sandwich Panel is for building walls. The EPS sandwich wall panel is widely used in the construction of residential and commercial buildings. It is available in a width of 950mm and can be customized according to the client's requirements. The panel's surface is prepainted, which enhances its aesthetic appeal. The EPS sandwich wall panel is an eco-friendly solution that can be recycled and reused, making it an excellent choice for sustainable construction projects.

Support and Services:

Our EPS Sandwich Panel product comes with comprehensive technical support and services.
